

# Industrial DDR5 DRAM Modules

## Unleash blazing-fast performance

Transcend's high-performance industrial DDR5 DRAM modules efficiently elevate AIoT applications across diverse domains, supporting real-time data transmission and meeting the demanding requirements of data processing extensively.

### Unmatched Performance

Independent dual-channel transfer for higher speeds at 5,600MT/s, 50% faster than DDR4.

### Assured Data Transfer

On-DIMM PMIC reduces signal complexity & on-die ECC offers better data integrity.

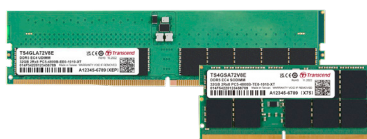

### Value-added Technologies

Extra-thick 30μm PCB gold fingers & wide temp. technology for stable data transmission.

## Featured Products

Unbuffered Long-DIMM /  
Unbuffered SO-DIMM

ECC Long-DIMM /  
ECC SO-DIMM

Registered Long-DIMM
