

5G Edge Server

Empower seamless 5G performance

With Transcend's innovative technologies, our industrial SSDs and DDR5 DRAM modules seamlessly enhance IIoT (Industrial Internet of Things) applications, providing superior storage, low latency, and rugged durability. Featuring advanced design elements, they excel in demanding environments, optimizing reliable performance to meet customers' needs in the ever-evolving landscape of artificial intelligence.

Exceptional Performance

Faster random R/W speeds improve system performance.

Fortified Durability

30μ" PCB gold fingers & anti-sulfur resistors help endure environmental extremes.

Quality Assurance

In-house chip sorting process and rigorous temperature tests for stable operations.
